

Improve Workforce Effectiveness with MobileDay Business

MobileDay Business enables your team to focus on doing their job more effectively. Whether in the office or on the road, employees can quickly, easily, and reliably join any call or meeting using their mobile devices.

MobileDay makes dialing into a virtual meeting or conference call **one-tap easy** and removes the hassle of searching for call passcodes or pin numbers. No more late starts due to misdialled numbers or misplaced access codes can give your team the inside track when it comes to connecting with clients and relaying information to each other.

Spotless First Impressions

MobileDay Business gets you on the call first time, every time.

Don't let a misdialled number or a failed conference bridge connection lead to disappointment. First impressions are important when it comes to influencing a potential client. Tardiness due to technical errors upon entering calls can lead to myriad unwanted effects, such as missed connections, crucial information being overlooked, and above all, being late gives your client the impression that you don't care for their business.

Enhance Team Communication

Technical difficulties are the number one cause of delayed meetings

Give your workforce the best chance at immaculate inter-team communication by taking out the dial-in frustration. MobileDay business makes connection easier, meaning that colleagues can jump on a call and relay important or time-sensitive information without delay. Enhanced team communication can lead to better relationships and improved performance.

Push for Connection

One-tap conference phone dial-in

Push extends MobileDay's one-tap dial-in experience to Polycom or desktop phones by allowing users to initiate a call via their mobile phone and direct it to another device. Push allows you to:

- Enjoy MobileDay's one-tap dial-in experience using conference room and desktop phones
- Instantly direct calls to conference room or desktop devices—such as Polycom, Cisco, Lync, Panasonic or other phones
- Select automatically recognized devices based on your location

29% of the global workforce is currently identified as anytime, anywhere information workers*

“Any technology has to be easy. And I’m talking one-button, my-grandmother-can-use-this easy. This is why I love MobileDay. Show it to a person once and have them download it. They never stop using it. No learning curve.

– Steve Richard,
Founder, VorsightBP

Improve Team Effectiveness

The biggest concerns for managers of mobile workforces are having a productive workforce and maintaining easy communication with team members and clients

Geared for the professional workforce, MobileDay Business allows teams to efficiently connect with one another; find out how your business communications can benefit:

- MobileDay automatically and securely syncs with your team’s iPhone or Android Calendars so no event is overlooked
- Employees can connect to pre-scheduled meetings with one tap when the dial-in notification appears on their device
- MobileDay works with any meeting platform or conference bridge and verifies dial-in sequences ahead of time
- Save money on wireless bills via Wi-Fi calling
- User dashboard relays information on call metrics and activity reports allowing team leaders to process at-a-glance data on team performance
